Infringement of Claim 1 of U.S. Patent No. 10,298,451 by Apple HomePod

a mobile computer device that is in communication with the electronic device via an ad hoc wireless communication link; and

Apple's HomePod is configured to connect to a mobile computer device that is in communication with the electronic device via an ad hoc wireless communication link.

Get started

- Make sure that your iPhone, iPad, or iPod touch is [updated to the latest version of iOS](#).
- On the iOS device that you use to set up HomePod, make sure that you are signed in to iCloud with your Apple ID and have [turned on iCloud Keychain](#). You also need to have [two-factor authentication set up for your Apple ID](#).
- Check that your iOS device has Bluetooth turned on and is [connected to your home Wi-Fi network](#).*
- Make sure that the Home app and Apple Music app are installed on your iOS device. If you deleted either of these apps, go to the App Store and redownload them.

Infringement of Claim 1 of U.S. Patent No. 10,298,451 by Apple HomePod

To set up HomePod:

1. Plug HomePod in to power. Wait for a chime and a pulsing white light to appear on the top of HomePod.
2. Unlock your iOS device and hold it next to HomePod. Tap Set Up when it appears on your iOS device's screen.
3. Pick a room, [enable Personal Requests](#), and transfer settings to automatically set up access to your information on iCloud, home Wi-Fi network, [Apple Music](#), and more. If you're setting up a second HomePod in the same room, you'll see an option to [use both speakers as a stereo pair](#).
4. When asked, center HomePod in the viewfinder on your iOS device to complete pairing. If you can't use your camera, tap Enter Passcode Manually and Siri will respond with a four-digit passcode to enter on your device.
5. Wait for HomePod to finish setup. Then Siri will greet you and give you a few examples of things you can ask.
